

Area of Irregular Figures

Materials: Pack of irregular figures that can be decomposed into squares or rectangles

1. Choose an irregular figure from the pack.
2. Separate the figure into rectangles.
3. Calculate the area of each individual figure.
4. Add the areas together to find the total area.
5. Repeat steps 1-4 with two other figures from the pack.
6. Order your figures from smallest to largest area.
