

Fraction Posters

Materials: pattern blocks, fraction kits, counters, coins, geoboards

1. Work with a partner. Select one of the following fractions:

$1/2$, $1/3$, or $1/4$

2. Use different materials to show the fraction you chose and represent this on a poster. Include a 'trick': one example that is not the fraction you chose.

3. Swap posters with another group and look for their 'trick'. Explain why this fraction doesn't belong on the poster.
