

Two Ways to Count to Ten

Materials: counters, 100 charts, copy of Two Ways to Count to Ten; Ruby Dee

1. After listening to the story, 'Two Ways to Count to Ten' solve the following problem:

Suppose the king wanted to try a larger number, like 30.
How many different ways could the animals skip count to 30?

2. Record your thinking.
3. Choose another number between 0 and 50. Show all the different ways the animals could skip count to this number.
