

# Build a Train

**Materials:** ziplock bag containing snap cubes of two colors

---

1. Work with a partner. Empty out a bag of snap cubes and sort them by color.
2. Build a train. Each carriage must have 10 snap cubes of the same color.
3. How many full carriages (tens) did you make? How many leftovers (ones) do you have?
4. Count the snap cubes by tens and ones. Draw the train and show how you counted the cubes.
