

Equal Parts of a Square

Materials: geoboards, rubber bands, ruler, geoboard paper

1. Make the largest square possible on a geoboard.
2. Show one way to cut the square into **two equal shares**.
Draw the square on geoboard paper. Color one-half of the square.
3. How many different ways can you find to cut the square into two equal shares? Draw and color each way you find.
4. Describe your work using words from the Word Bank.

Word Bank: square whole fraction
two equal shares half of halves
