

Estimating Differences

Materials: numeral cards (0-9)

1. Turn over four cards to make two 2-digit numbers.
2. Estimate the difference between the two numbers by rounding each number to the nearest ten and subtracting mentally.
3. Repeat with other pairs of 2-digit numbers.

Example:

	7	9	→	80		80 - 30 = 50
-	2	8	→	30
