

Fraction Barrier Game

Materials: Fraction Barrier Game grid for each player, large book or folder to use as divider

1. Work with a partner. Sit opposite one another with a divider between you so that you cannot see each other's grid.
2. Player 1: Shade in a fraction of each shape on your grid without letting your partner see your work. Label each fraction.
3. Player 1: Give clear instructions to your partner on how to shade in and label a fraction of each shape to match your grid. After you have given instructions for each shape remove the divider.
5. Both players: Look closely at your two completed grids to see how closely they match. Discuss any differences.
6. Swap roles and play again.
