

Fractions and Decimals

$$\frac{23}{100} \text{ or } 0.23$$

Materials: paper cups, plastic spoons, base ten blocks

1. Fill a paper cup with base ten unit cubes. Using a spoon take two scoops of cubes from the cup and place them on a base ten flat. Give the flat the value of ONE.
2. Shade a grid to show how many unit cubes you placed on the flat.
3. Represent the number of unit cubes in fraction and decimal notation.
4. Repeat six times.
5. Write the decimals in order from least to greatest.
