

# Geoboard Squares

**Materials:** geoboards, rubber bands, ruler, geoboard paper, scissors, glue

---

1. Make a square on a geoboard.
2. Using a ruler draw the square on geoboard paper and cut it out.
3. Make a square that is bigger or smaller than your first square. Draw your new square and cut it out.
4. Keep going until you have made and drawn as many different sized squares as you can.
5. Paste all of your different sized squares onto a sheet of paper in order from smallest to largest.

I made \_\_\_ different sized squares.

I made \_\_\_ different sized squares.

My largest square had \_\_\_ pins inside.

I made \_\_\_ different sized squares.

My smallest square had \_\_\_ pins inside.
