

Name Geometry

1. Write your first name in upper case letters in large print on a sheet of paper.
2. Look for examples of geometry in the letters of your name. Clearly label each example. Consider the following:
 - Which letters in your name have a line of symmetry?
 - Do you see any perpendicular or parallel lines?
 - Do you see any right, acute or obtuse angles?
 - Do you see any line segments or rays?
 - Do you see any shapes within the letters?
