

Paper Ball Throw

Materials: bucket or trash can, 10 small balls of paper, graph paper

1. Work with a partner. Collect 10 small balls of paper. Stand four large steps away from the bucket.
2. Take turns to try and throw one ball of paper at a time into the bucket. Throw five balls with your left hand and five balls with your right hand.
3. Use a tally chart to keep track of how many times the balls of paper land in the bucket.

Name	Right Hand	Left Hand

4. Display your data on a bar graph. Be sure to give your graph a title and number the scale. Label your categories. Draw the bars using the data you collected.
5. Analyze your data. Write 3 sentences describing your data.

I threw ____ paper balls into the bucket with my right hand and ____ with my left hand.

I threw ____ more/less paper balls into the bucket than my partner.

I threw ____ more paper balls into the bucket with my ____ hand than my ____ hand.

My partner and I threw ____ paper balls into the bucket in all.
