

# Pizza for Dinner

**Materials:** fraction kits (optional)

---

Leo and Tom were talking about what they ate for dinner the previous evening. Leo said, “My family bought a large pizza and I ate  $\frac{2}{4}$  of it.” Tom replied, “I ate more than you. My family bought a large pizza and I ate  $\frac{4}{8}$  of it.” Sarah said, “Tom, you didn’t eat more pizza than Leo. You ate the same amount.”

Who is correct? Explain your thinking. Use fraction models to justify your conclusion.
