

# Subtract and Compare

**Materials:** Subtract and Compare board, 2 dice

**Number of Players:** 2

---

1. Work with a partner. Take turns to roll two dice. After each roll both players must decide in which two boxes on the board to write the numbers rolled. Be strategic! You can place the numbers anywhere on your board but your goal is to have the difference closest to zero for each problem.
2. When all boxes are filled players calculate the difference for each problem.
3. Check your partner's work and compare your answers. The player with the difference closest to zero for each problem scores one point. The player with the most points wins the game.

1.  $\frac{\square}{6} - \frac{\square}{6} = \underline{\quad}$

2.  $\frac{\square}{8} - \frac{\square}{8} = \underline{\quad}$

## Subtract and Compare

1.  $\frac{\square}{6} - \frac{\square}{6} = \underline{\hspace{2cm}}$

2.  $\frac{\square}{8} - \frac{\square}{8} = \underline{\hspace{2cm}}$

3.  $\frac{\square}{7} - \frac{\square}{7} = \underline{\hspace{2cm}}$

4.  $\frac{\square}{5} - \frac{\square}{5} = \underline{\hspace{2cm}}$

5.  $\frac{\square}{4} - \frac{\square}{4} = \underline{\hspace{2cm}}$

## Subtract and Compare

1.  $\frac{\square}{6} - \frac{\square}{6} = \underline{\hspace{2cm}}$

2.  $\frac{\square}{8} - \frac{\square}{8} = \underline{\hspace{2cm}}$

3.  $\frac{\square}{7} - \frac{\square}{7} = \underline{\hspace{2cm}}$

4.  $\frac{\square}{5} - \frac{\square}{5} = \underline{\hspace{2cm}}$

5.  $\frac{\square}{4} - \frac{\square}{4} = \underline{\hspace{2cm}}$
