

# Two Ways to Count to Ten

**Materials:** copy of *Two Ways to Count to Ten* by Ruby Dee

---

1. After listening to the story solve the following problem:

**Suppose the king wanted to try a larger number, such as 30. How many different ways could the animals skip count to 30?**

2. Record your thinking.

3. Which would be the fastest way to count to 30? Why?

4. Choose another number between 0 and 50. Show all the different ways the animals could skip count to this number.
