

Which is Heavier?

Materials: balance scales, variety of objects to weigh

1. Work with a partner. Choose two objects. Put one object on each side of the balance scales. Which object is heavier? How do you know?
2. Talk to your partner about what you notice.
3. Draw the two objects. Label the object that is **heavier**.
4. Repeat with a different pair of objects.

The ____ is
heavier than the
_____.

The _____ is
heavier than the
_____.

The _____ is
